

Amendments to the Specification:

Please amend paragraphs [0050], as following:

[0050] The system allows the content hierarchy to be reorganized and allows content properties to be edited. Users can add hierarchy nodes and content nodes. In one embodiment, nodes can be added in two different ways: through use of a batch loading utility or via a user interface. The following related U.S. patent application which is included herein in its entirety by reference includes information pertaining to batch loading a virtual content repository: CONTENT MINING FOR VIRTUAL CONTENT REPOSITORIES, U.S. Application No. [[_____]] 10/772,625, Inventors: Gregory Smith, et al., filed on [[_____]] February 5, 2004.
